

# ALL PURPOSE SOAP POSEIDON SURF

**POSEIDON SURF** is a premium, fast acting detergent specially formulated with a unique surfactant-to-builder ratio. This careful formulation allows Poseidon Surf to penetrate and disperse normal grime and build up. Poseidon Surf contains special chelating agents to counter hard water mineral deposits to safely and effectively wash away dirt, bugs, dust, and road film.

**POSEIDON SURF** because of its high concentration levels of special water conditioners allow a small amount of Poseidon Surf to go a long way without losing its effectiveness. The dilution ration for most applications is 2-4 ounces per gallon of water.

**POSEIDON SURF** is biodegradable. If water can be used on a hard surface without harming it, Poseidon Surf is a safe choice. Poseidon Surf packs a powerful punch that safely cleans and leaves equipment protected and shining.

**POSEIDON SURF** when used through a pressure washer with a direct chemical injector, Poseidon Surf can be metered directly from its container at a ratio of 50:1 for most applications when water hardness is moderate to high.
